

SENATOR WITHEM: I don't remember exactly. There's nothing that you're saying that I would contradict at this point. I'd have to go back and check the records on what their needs are.

SENATOR CHAMBERS: Okay, and I'm not holding you to the specific amount, but if that amount is correct, who told you that that is not an amount which if...

PRESIDENT ROBAK: One minute.

SENATOR CHAMBERS: ...drawn every day from now in perpetuity will not create any difficulty?

SENATOR WITHEM: Well, in perpetuity, obviously, a drop of water a day would cause problems, but...

SENATOR CHAMBERS: And we expect Micron to be here for a long, long time, is that right?

SENATOR WITHEM: Sometime between a long time and in perpetuity, yes.

SENATOR CHAMBERS: Okay. But you have talked to somebody who is in a position to understand this, not just those who want the bill, but somebody who really would understand the...

SENATOR WITHEM: I have not checked with an expert on water policy to determine what a 2 million gallon draw would do. It's been represented to me that that is not...it is a significant amount of water that cannot be gathered everywhere, but it is not something that will cause significant problems.

SENATOR CHAMBERS: Are there any places in Omaha where that amount could not easily and readily be withdrawn?

PRESIDENT ROBAK: Time. Thank you, Senator. Any further discussion on the Coordsen amendment? Seeing none, Senator Coordsen, do you wish to close?

SENATOR COORDSEN: Thank you, Madam President, members of the body, I would indicate again for you that this is my attempt in providing notification to the affected landowners at the time that an application is made to the State of Nebraska under the other requirements of the Nebraska Redevelopment Act to designate a particular area as blighted and substandard, using
